

Set up for Ad-Aware SE Personal (SPYWARE)

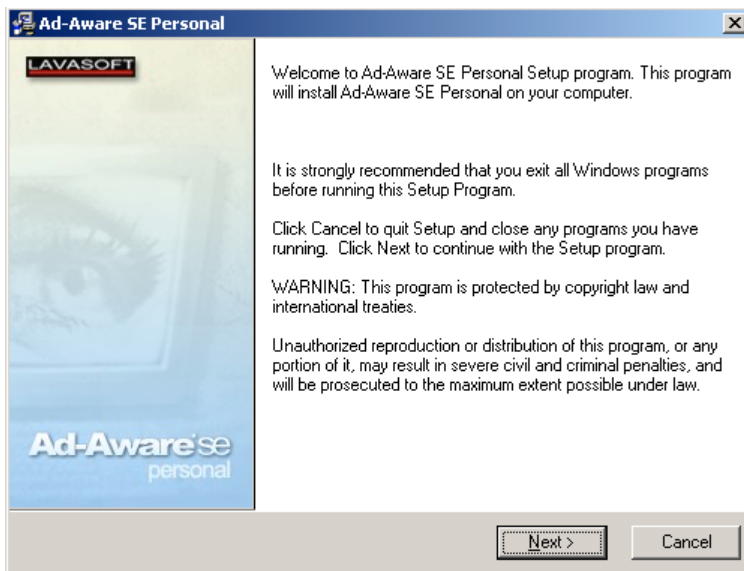

Go to [Membership Services](#) and log into the Membership Services area to download the Ad-Aware SE Personal. This software is designed to detect and remove any instances of spyware that may be on your PC. It is designed for Windows operating systems 98/ME/NT/2000/XP, and this version is available for residential users. Commercial customers or customers who use their computer(s) for profit must purchase the commercial version from Lavasoft (www.lavasoft.com), or consult their network administrator for alternative spyware removal software.

When downloading the program, be sure to save it on the desktop. Once the download is completed, double click the installation file. aawsepersonal.exe, (figA)

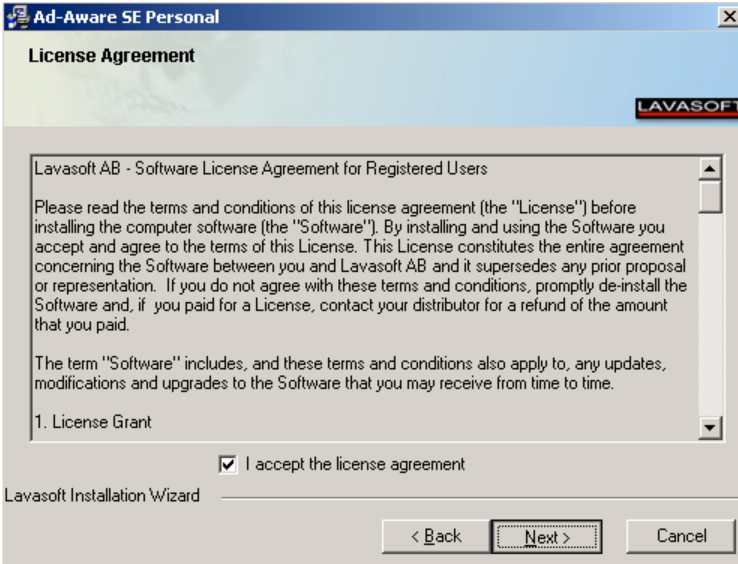

(figA)

Click the "next" button to continue after reading each screen. (figB)

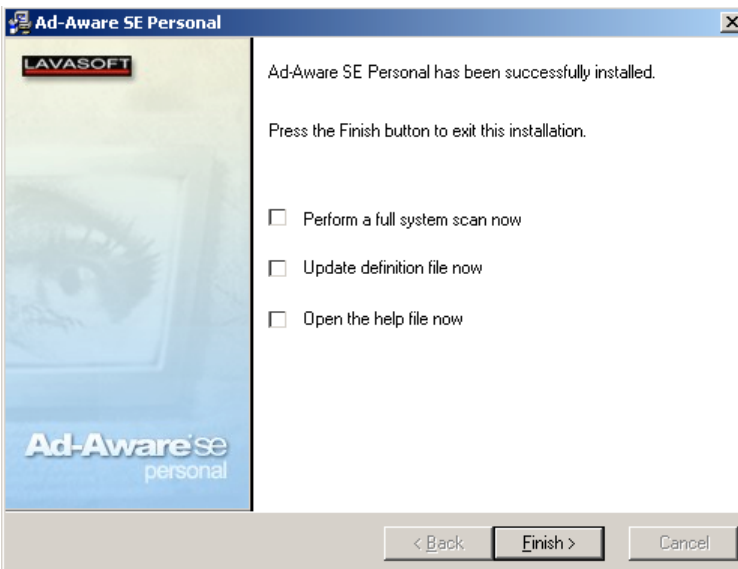

(figB)

Read the License Agreement, if acceptable, click the accept box, and then click next. (figC)

(figC)

Continue clicking the next button until you reach the final page where there is a "Finish" button. Uncheck the boxes and click "Finish". (figD)

(figD)

This completes the installation of Ad-Aware SE Personal. Continued below are instructions on how to perform scans of the PC for spyware.

Performing Scans

After completing the download and install of the Ad-Aware SE Personal software, double click the icon on the desktop to launch the program. (fig1)

Once Ad-Aware is open (fig2), check for any updates by clicking the "Check for updates now" link near the lower right corner. Click the connect button and Ad-Aware will update itself. (fig3)

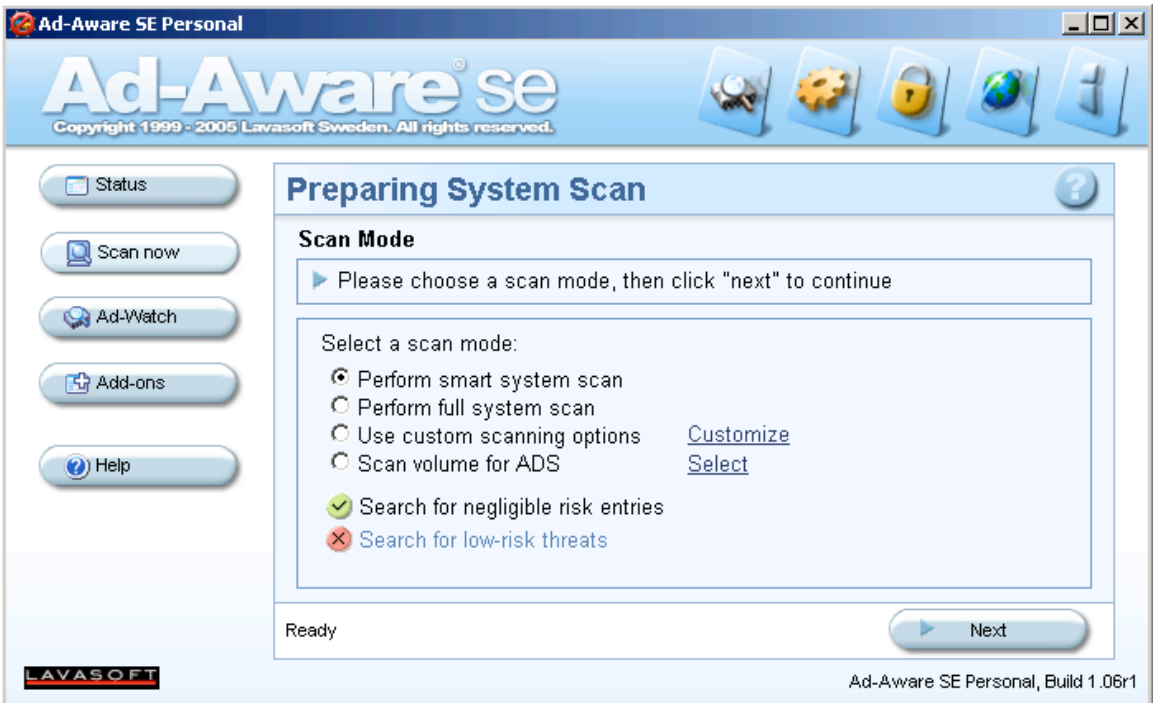

(fig2)

(fig3)

Once the updates are done, you are ready to scan the PC for any instances of spyware. To begin the scan click the start button in the lower right. (fig2)

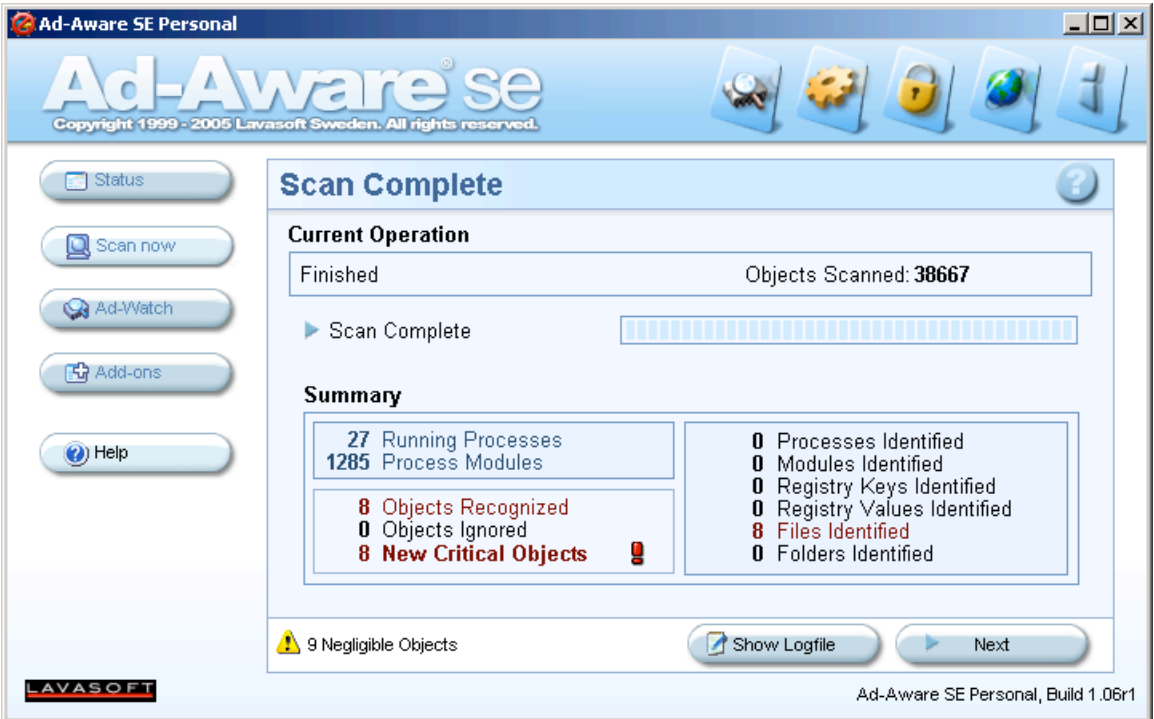

Choose the "Perform smart system scan", and click next.(fig4)

(fig4)

The scanning process can take awhile to finish depending on the amount of files on your computer.

After the scan completes click the next button. (fig5)

If the scan has found any spyware objects, it will list them in the left column. To select a single object click the check box next to the object. To select all the objects, right click an object, and choose "Select all objects". (fig6)

(fig6)

To remove the detected objects, choose next. It will prompt you whether or not you do wish to remove the selected objects. If you choose the 'OK' to remove the objects, it will quarantine the objects. (fig7)

(fig7)

This completes the Ad-Aware SE Personal spyware scanning tutorial.
